WEB DEVELOPER & DIGITAL MARKETING

KATIUSKA BLANCO*

kattywhite.millhiorebt.com / github.com/Kattywhite / kattycommunity@gmail.com / Venezuela

PROFILE

I build websites of all kinds, from a single landing page to a full site backed by a database. I care about design, speed, and making sure every site does its job: attracting and converting customers.

I work daily with AI coding agents (Claude Code, among others) and adapt quickly to any of them, which lets me deliver faster, at higher quality, and take on more ambitious projects.

WHAT I BUILD

- Landing pages, business sites, portfolios, blogs, catalogs, and online stores
- Responsive designs that look great on phones, tablets, and desktops
- Database-backed features: forms, sign-ups, dynamic content, and admin dashboards
- Conversion-focused pages with basic SEO, content, and social media presence
- Updates, fixes, and improvements for existing sites

SELECTED WORK

Lilian Solutions

liliansolutions.com

Bilingual business website for an accounting, tax and immigration services firm in Florida, with a WhatsApp-first booking flow. Built with Astro.

Personal portfolio

kattywhite.millhiorebt.com

Dark, fast Astro site with zero client-side JavaScript, structured data and a full SEO setup.

claude-usage-bar

github.com/Kattywhite/claude-usage-bar

Open-source status line for Claude Code that shows the model and the 5-hour usage limit. One-command install, zero dependencies.
